INDEX TO VOLUME XLIII, 1931.

PAGE

Acheron, H. M. S. (Note) 639
Aircraft Engines, Trend of Design in, by Horace Sawyer Mazet 590
Airship Design, Progress in From U. S. S. *Shenandoah* to U. S. S. *Akron*, by C. P. Burgess 419
Akron, U. S. N. (Note) 496
Ammonia Gas, Case-Hardening With (Note) 322
Analysis of Straight Line Plotting Data, by Leonard Kaplan 396
Anti-Friction White Metals, Brasses and Bronzes (Note) 150
Armistice Day (Note) 683
Association Notes 181, 369, 510, 686
Babcock and Wilcox High Pressure Sectional Express Boiler, by R. C. Brierly 511
Balancing of Rotating Masses, Discussion of Paper by H. G. Eberhart, by F. A. Tusler 112
Batteries, Storage, Nickel-Iron-Alkaline Type vs. Lead-Acid Types, Trend in Naval Engineering, by C. Huey 218
Boiler, An Early Water-Tube (Note) 679
Boiler, Babcock and Wilcox High Pressure Sectional Express, by R. C. Brierly 511
Boiler, Building and Inspection of a, by W. A. Brooks 43
Boilers, Naval, Firebrick for, by James B. Donnelly 562
Book Reviews 178, 366, 504, 684
Brasses, Bronzes and Anti-Friction White Metals (Note) 150
Bremen, Liner, and Its Predecessors, Machinery Installations of (Note) 153
Brierly, R. C., Lieut. Commander, U. S. N. R., Babcock and Wilcox High Pressure Sectional Express Boiler 511
Bronzes, Brasses and Anti-Friction White Metals (Note) 150
Brooks, W. A., Lieutenant, U. S. N., The Building and Inspection of a Boiler 43
Burgess, C. P., Progress in Airship Design From U. S. S. *Shenandoah* to U. S. S. *Akron* 419
Cables and Wires, Electric, Protection and Insulation of; Trend in Naval Engineering, by C. Huey 582
Canoose, John, Lieutenant U. S. N., Fuel Measuring Pump Pressures and Their Effects on Performance 1

PAGE

Case-Hardening With Ammonia Gas (Note) 322
Castings, Bronze, Unsoundness in (Note) 126
Cast Iron, Use of Pure Iron Electrodes for Welding (Note) 349
Characteristics, Construction and Operation of Photoelectric Tubes (Note) 308
Cleary, F. J., Commander, U. S. N., The Material Laboratory, U. S. Navy Yard, New York 54
Coal, Oil From (Note) 674
Coating, Metallic, Effect of Upon Fatigue (Note) 152
Commutators, Generator and Motor, Direct Current; Flush Insulations Versus Undercut, by C. Huey 221
Condenser Scoops in Marine Installations, by H. J. Hanzlik 250
Construction, Operation and Characteristics of Photoelectric Tubes (Note) 308
Copper-Nickel Steels, Resistance of to Sea Action (Note) 494
Corrosion and Heat Resisting Steels (Note) 325
Cox, O. L., Captain, U. S. N., and Mr. Henry F. Schmidt, Test on a One-quarter Scale Model Scoop on the U. S. S. *Welborn C. Wood* and Preparatory Laboratory Experiments 435
Creep of Metals at Elevated Temperatures (Note) 354
Cruisers, German, *Konigsberg* Class, Propelling Plant of (Note) 669
Davis, H. F. D., Commander, U. S. N., and Mr. A. R. Shedd, Friction of Ship Propeller Shafting When Starting 265
Davis, H. F. D., Commander, U. S. N., Some Notes on Propeller Operation 32
Design and Operation of Steam Jet Vacuum Pumps, Discussion of, by J. W. McNulty 193
Design of Large Ships, Effect of Modern Machinery on (Note) 674
Diesel Engines, Welded Frames for (Note) 681
Diesel Framing, Trend in and the Function of the Tie Rod, by John O. Huse 228
Discussion of the Design and Operation of Steam Jet Vacuum Pumps, by J. W. McNulty 193
Donnelly, James B., Lieutenant, U. S. N., Firebrick for Naval Boilers .. 562
Electric Wires and Cables, Protection and Insulation of; Trend in Naval Engineering, by C. Huey 582
Electrodes, Pure Iron, Use of for Welding Cast Iron (Note) 349
Electron Tubes in Industry, by W. R. King 269
Engineering, Naval, Trend in; Electric Wires and Cables, Protection and Insulation of, by C. Huey 582
Engineering, Naval, Trend in; Searchlight Mirrors—Mangin Versus Parabolic, by C. Huey 38
Engineering, Naval, Trend in, Sound Versus Silent Motion Pictures, by C. Huey 418

PAGE

Engineering, Naval, Trend in; Storage Batteries, Nickel-Iron-Alkaline Type vs. Lead-Acid Types, by C. Huey 218
Engines, Aircraft, Trend of Design in, by Horace Sawyer Mazet 590
Engines, Diesel, Welded Frames for (Note) 681
Express Boiler, Sectional High Pressure, Babcock and Wilcox, by R. C. Brierly 511
Fatigue, Effect Upon of Metallic Coating (Note) 152
Feed Water Heating, New Aspect of (Note) 644
Firebrick for Naval Boilers, by James B. Donnelly 562
Framing, Diesel, Trend in and the Function of the Tie Rod, by John O. Huse 228
Frames, Welded, for Diesel Engines (Note) 681
Friction of Ship Propeller Shafting When Starting, by H. F. D. Davis and A. R. Shedd 265
Fuel Measuring Pump Pressures and Their Effects on Performance, by John Canoose 1
Gamma Rays from Radium, Non-Destructive Testing by, by Robert F. Mehl 371
Generator and Motor Commutators, Direct Current; Flush Insulations vs. Undercut, by C. Huey 221
Gregory, Henderson B., New Dollar Liners S. S. *President Hoover* and S. S. *President Coolidge*, Description of Vessels, Machinery and Trials 610
Hanzlik, H. J., Condenser Scoops, in Marine Installations 250
Heat and Corrosion Resisting Steels (Note) 325
Heat Recovery on Motorships (Note) 147
Heating, Feed Water, New Aspect of (Note) 644
High-Speed Worm Drives (Note) 474
Huey, C., Direct Current Motor and Generator Commutators; Flush Insulations vs. Undercut 221
Trend in Naval Engineering; Electric Wires and Cables, Protection and Insulation of 582
Trend in Naval Engineering; Searchlight Mirrors—Mangin vs. Parabolic 38
Trend in Naval Engineering, Sound vs. Silent Motion Pictures 414
Trend in Naval Engineering; Storage Batteries; Nickel-Iron-Alkaline Type vs. Lead-Acid Types 218
Huse, John O., Trend in Diesel Framing and the Function of the Tie Rod 228
Hydrogenation of Petroleum (Note) 360
Insulation and Protection of Electric Wires and Cables; Trend in Naval Engineering, by C. Huey 582
Insulation on Electrical Machines, What Is Good (Note) 342

PAGE

Insulations, Flush vs. Undercut for Direct Current Generator and Motor Commutators, by C. Huey 221
Iron Electrodes, Pure, Use of for Welding Cast Iron (Note) 349
Kaplan, Leonard, Lieutenant (C. C.) U. S. N., Analysis of Straight Line Plotting Data 396
King, W. R., Electron Tubes in Industry 269
Konigsberg Class of German Cruisers, Propelling Plant of (Note) 669
Laboratory Material, U. S. Navy Yard, New York, by F. J. Cleary 54
Lamb, Carl J., Lieutenant U. S. N. R., Modern Machinery for the Yangtze River Gunboats 426
McNulty, J. W., A Discussion of the Design and Operation of Steam Jet Vacuum Pumps 193
Machinery, Modern, Effect of on the Design of Large Ships (Note) 674
Machinery for the Yangtze River Gunboats, Modern, by Carl J. Lamb 426
Machinery Installations of the Liner *Bremen* and Its Predecessors (Note) 153
Mazet, Horace Sawyer, Lieut. M. C. Reserve, Trend of Design in Aircraft Engines 590
Mehl, Robert F., Ph.D., Non-Destructive Testing by Gamma Rays from Radium 371
Metallic Coating, Effect of Upon Fatigue (Note) 152
Metals, Creep of at Elevated Temperatures (Note) 354
Mirrors, Searchlight, Mangin vs. Parabolic, Trend in Naval Engineering, by C. Huey 38
Motion Picture Equipment, Sound for the Navy, by H. C. Rule 105
Motion Pictures, Sound vs. Silent; Trend in Naval Engineering, by C. Huey 414
Motor and Generator Commutators, Direct Current; Flush Insulations vs. Undercut, by C. Huey 221
Motorships, Heat Recovery on (Note) 147
Nitrogen, Contamination by; Effect of on the Structure of Electric Welds (Note) 140
Oil From Coal (Note) 674
Operation, Construction and Characteristics of Photoelectric Tubes (Note) 308
Petroleum, Hydrogenation of (Note) 360
Photoelectric Tubes, Construction, Operation and Characteristics of (Note) 308
Plotting Data, Straight Line, Analysis of, by Leonard Kaplan 396
President Coolidge and *President Hoover*, New Dollar Liners; Description of Vessels, Machinery and Trials, by Henderson B. Gregory 610
Pressures, Fuel Measuring Pump, and Their Effects on Performance, by John Canoose 1

PAGE

Pressures, Steam, Super, Prospects for the Application of in Ships (Note) 486
Progress in Airship Design from U. S. S. *Shenandoah* to U. S. S. *Akron*, by C. P. Burgess 419
Propeller Operation, Some Notes on, by H. F. D. Davis 32
Propeller Shafting, Ship, Friction of When Starting, by H. F. D. Davis and A. R. Shedd 265
Pump Pressures, Fuel Measuring, and Their Effects on Performance, by John Canoose 1
Pumps, Steam Jet Vacuum, A Discussion of Design and Operation of, by J. W. McNulty 193
Radium, Gamma Rays From; Non-Destructive Testing by, by Robert F. Mehl 371
Resistance of Copper-Nickel Steels to Sea Action (Note) 494
Rotating Masses, Balancing of, Discussion of paper by H. G. Eberhart, by F. A. Tusler 112
Rule, H. C., Lieutenant, U. S. N., Sound Motion Picture Equipment for the Navy 105
Schmidt, Mr. Henry F., and Captain O. L. Cox, U. S. N.; Test on a One-Quarter Scale Model Scoop on the U. S. S. *Welborn C. Wood* and Preparatory Laboratory Experiments 435
Scoop, One Quarter Scale Model; Test of on U S. S. *Welborn C. Wood* and Preparatory Laboratory Experiments, by Henry F. Schmidt and O. L. Cox 435
Scoops, Condenser, in Marine Installations, by H. J. Hanzlik 250
Sea Action, Resistance of Copper-Nickel Steels to (Note) 494
Searchlight Mirrors, Mangin vs. Parabolic, Trend in Naval Engineering, by C. Huey 38
Sectional Express Boiler, High Pressure, Babcock and Wilcox, by R. C. Brierly 511
Shafting, Ship Propeller, Friction of When Starting, by H. F. D. Davis and A. R. Shedd 265
Shedd, Mr. A. R. and Davis, H. F. D., Commander, U. S. N., Friction of Ship Propeller Shafting When Starting 265
Ships, Large, Effect of Modern Machinery on Design of (Note) 674
Silent vs. Sound Motion Pictures, Trend in Naval Engineering, by C. Huey 414
Sound Motion Picture Equipment for the Navy, by H. C. Rule 105
Sound vs. Silent Motion Pictures, Trend in Naval Engineering, by C. Huey 414
Steel Industry, X-Rays in the (Note) 468
Steels, Copper-Nickel, Resistance of to Sea Action (Note) 494
Steels, Corrosion and Heat Resisting (Note) 325

PAGE

Super Steam Pressures, Prospects for the Application of in Ships (Note) 486
Test on a One-Quarter Scale Model Scoop on the U. S. S. *Welborn C. Wood* and Preparatory Laboratory Experiments, by Henry F. Schmidt and O. L. Cox 435
Testing, Non-Destructive, by Gamma Rays from Radium, by Robert F. Mehl 371
Trials; *President Hoover* and *President Coolidge*, New Dollar Liners, Description of and of Vessels and Machinery, by Henderson B. Gregory 610
Tubes, Photoelectric, Construction, Operation and Characteristics of (Note) 308
Turbine Disc Wheels, Steam, Rotating, Axial Vibration of (Note) 296
Turbine, Steam, Development, Trends in (Note) 331
Tusler, F. A., Lieutenant (CC) U. S. N., Discussion of Paper on Balancing of Rotating Masses, by H. G. Eberhart 112
Vibration, Axial, of Rotating Steam Turbine Disc Wheels (Note) 296
Water, Feed, New Aspect of Heating (Note) 644
Water-Tube Boiler, Early (Note) 679
U. S. S. *Welborn C. Wood:* Test on a One-Quarter Scale Model Scoop on and Preparatory Laboratory Experiments, by Henry F. Schmidt and O. L. Cox 435
Welded Frame for Diesel Engines (Note) 681
Welding Cast Iron, Use of Pure Iron Electrodes for (Note) 349
Welds, Electric, Effect of Contamination by Nitrogen on the Structure of (Note) 140
Wheels, Steam Turbine Disc, Rotating, Axial Vibration of (Note) 296
Wires and Cables, Electric, Protection and Insulation of; Trend in Naval Engineering, by C. Huey 582
Worm Drives, High-Speed (Note) 474
X-Rays in the Steel Industry (Note) 468
Yangtze River Gunboats, Modern Machinery for, by Carl J. Lamb 426

ERRATA.

In the article "Progress in the Field of Steam Engineering" published in the JOURNAL of August, make the following correction:

On page 460 a sentence about Entropy reads incorrectly. It *should* read—"This may be defined as being a measure of the *unavailability* of the energy of the steam for doing work. As the pressure is raised, the Entropy *decreases*, hence its available energy increases".
